## WATER ENFORCEMENT PROPOSAL

We have lived in Mesa Del for over 6 years and have tried to conserve our water, we use rain barrels, have grey water piped out to the trees and only flush the toilet when it has other than urine in it. I really would vote a price increase instead of a water enforcement proposal that does us no good. I went to the water meeting and everytime someone asked Brooks Water about something that had to do with what the water company was doing for us or anything that pretained to maintenance or question that the people wanted answered about the service, SHE gave no answers to anyone.

We feel the proposed water enforcement is an UFAIR METHOD only to increase fees and DECREASE water usage and only will hurt the people that use less water.

How can anyone have family visit and fear that we will go over our water usage and have the water turned off?.

I do not like the idea of taking last years usage and then this years usage of water and then telling a customer to stay in that area, people change and their families change and there are times when more water needs to be used.
